# ADDRESSING EASTERN REDCEDAR *in the* NEBRASKA SANDHILLS

# WHAT WE DO

## WORK

- Work directly with Sandhills landowners to increase prescribed fire capacity

## PROVIDE

- Provide training and workshops

## ORGANIZE

- Organize field trips and demonstration burns

## HELP

- Help landowners to implement prescribed fire on their land with one-on-one instruction

## IDENTIFY

- Identify resources available to facilitate prescribed fire

## WHERE WE WORK:

### The Nebraska Sandhills

The Sandhills comprise **12 million acres** of native prairie, one of the largest intact temperate grasslands in the world.

The main threats to the region are loss of rangeland due to land conversion and **encroachment of Eastern redcedar**.

We aim to mitigate this spread with prescribed fire, safeguarding the **economic** and **ecologic** vitality of the Sandhills for generations to come.

## PRESCRIBED FIRE TRAINING

Join our fire partners for hands-on workshops and learn what it takes to successfully burn in Nebraska:

- What to expect before, during, and after a burn
- Ignition devices and patterns
- Radio communication
- Understanding and reading the fire environment
